

POWER RACE

Cycling Eyewear since 2004

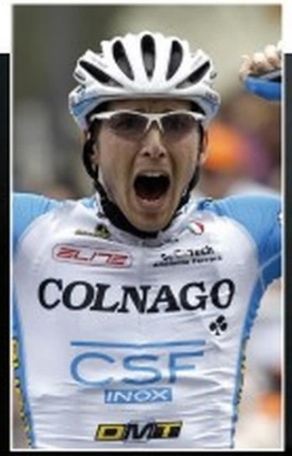

Power Race è un brand Italiano nato nell'ormai lontano Aprile 2004. Occhiali tecnici con un eccellente rapporto qualità/prezzo usati non solo dai professionisti ma anche da migliaia di ciclisti amatoriali in tutto il mondo. Occhiali testati da campioni stranieri del calibro di Peter Sagan o Miguel Angel Lopez e italiani tra cui Manuel Belletti o Domenico Pozzovivo, solo per citarne alcuni. Presenti in Italia in quasi 500 punti vendita e all'estero in una dozzina di nazioni. Quasi 200.000 paia di occhiali tecnici per ciclisti venduti in tutto il mondo. Un servizio post vendita di accessori dedicato on-line dove poter reperire lenti, naselli e terminali di astine anche di modelli risalenti a oltre 10 anni fa a testimoniare la qualità del nostro customer service ed il valore di un occhiale Power Race nel tempo. Montature elastiche pieghevoli garantite a vita, naselli regolabili e anti-allergenici, lenti ventilate e custodie rigide con panno pulisci lenti di alta qualità sono solo alcuni degli esempi per dimostrare l'amore, la cura e la passione che mettiamo nella ricerca e sviluppo dei nostri prodotti. Per la persona più importante: tu.

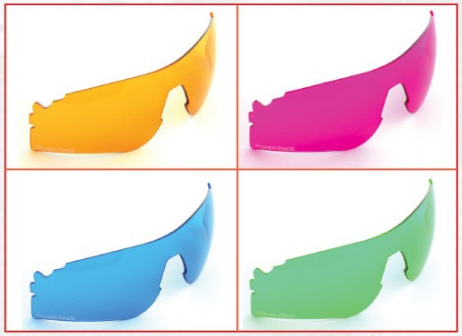

Power Race is an Italian brand born in the now distant April 2004. Technical sunglasses with an excellent price/quality ratio used not only by professionals but also by thousands of amateur cyclists all over the world. Sunglasses tested by foreign champions of the caliber of Peter Sagan or Miguel Angel Lopez and Italians ones including Manuel Belletti or Domenico Pozzovivo, just to name a few. Available in Italy in about 500 stores and abroad in a dozen countries. Almost 200.000 pairs of technical sunglasses for cyclists sold worldwide. An online dedicated after-sales service where you can find lenses, nose pads and temples also for models dating back more than 10 years ago to witness the quality of our customer service and the value of a Power Race sunglass over time. Foldable elastic frames lifetime guaranteed, adjustable and anti-allergenic nose-pads, vented lenses and rigid cases with high quality lens cleaning cloths are just some of the examples to prove the love, care and passion that we put into the research and development of our products. For the most important person: you.

1. INTERCHANGEABLE LENS SYSTEM™.

Le lenti possono facilmente e velocemente essere sostituite. Svariati modelli disponibili.
Lenses can be easily and swiftly changed. Plenty of types available.
Las lentes se pueden cambiar con facilidad y rapidez. Muchos tipos disponibles.
Les verres peuvent être facilement et rapidement changés. Beaucoup de versions disponibles.

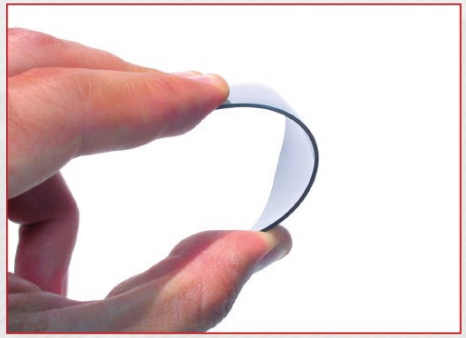

2. VENTILATION AIR CONTROL SYSTEM™.

Le lenti hanno dei fori per prevenirne l'appannamento e mantenere gli occhi asciutti.
Lenses have holes to prevent fogging and to keep your eyes dry.
Las lentes tienen agujeros para evitar que se empañen y para mantener los ojos secos.
Les verres ont des trous pour éviter la formation de buée et garder les yeux au sec.

3. GRILAMID TR90™ FRAMES.

Sono montature flessibili, pieghevoli, elastiche e molto sicure. Virtualmente indistruttibili.
Frames which are flexible, foldable, elastic and very safe. Virtually unbreakable.
Monturas que son flexibles, plegables, elásticas y muy seguras. Indestrutibles.
Montures qui sont flexibles, pliables, souples et très sécuritaires. Virtuellement incassables.

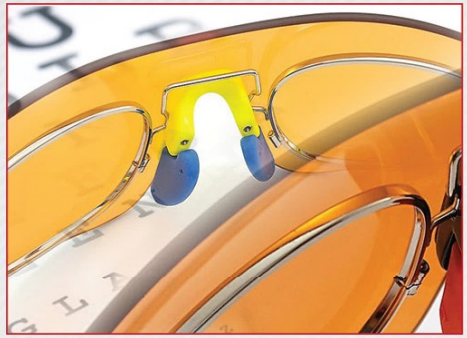

4. POLARIZED LENS TECHNOLOGY.

Per eliminare il fastidioso abbagliamento. Pieghevoli, per la massima sicurezza.
To eliminate the annoying glare. Foldable, for the maximum safety.
Para eliminar el reflejo molesto. Plegables, para la máxima seguridad.
Pour éliminer l'éblouissement gênant. Pliables, pour une sécurité maximale.

5. UV400 BLOCKING.

Per eliminare completamente i dannosi raggi ultravioletti fino a 400nm.
To completely neutralize harmful ultraviolet radiations up to 400nm.
Para neutralizar completamente las radiaciones ultravioletas nocivas hasta 400nm. Pour neutraliser complètement les rayons ultraviolets nocifs jusqu'à 400 nm.

6. OPTICAL RX INSERTS.

Montature disegnate per alloggiare al loro interno lenti correttive.
Frames designed to fit in prescription lenses.
Monturas diseñadas para añadir lentes de prescripción.
Montures conçues pour s'adapter aux verres de prescription.

7. ADJUSTABLE NODE PADS.

In doppia mescola. Per assicurare il massimo confort ed una sicurezza totale.
In dual compound. To ensure maximum comfort and total safety.
En doble compuesto. Para garantizar el máximo confort y seguridad.
En double composé. Pour assurer un maximum de confort et une sécurité totale.

8. CUSTOM TEMPLE-TIPS.

Per personalizzare il tuo occhiale con un look unico e personale. Intercambiabili.
To customize your sunglass with a unique and personal look. Interchangeable.
Para personalizar sus gafas de sol con un look único y personal. Intercambiables.
Pour personnaliser votre paire de lunettes avec un look unique et personnel. Interchangeable.

9. HYDROTECK™ LENS SYSTEM.

Per far scivolar via acqua e sudore così da avere sempre un' ottima visione.
To repel water and sweat thus to always have a sharp and clear vision.
Para repeler el agua y el sudor así tener siempre una visión clara y nítida.
Pour repousser l'eau et la transpiration afin d'avoir une vision nette et claire.

10. DECENTERED LENS TECHNOLOGY.

Per eliminare la distorsione e prevenire il fastidioso "effetto ingrandimento".
To eliminate distortion and prevent the annoying "magnification effect".
Para eliminar la distorsión y evitar el molesto "efecto de ampliación".
Pour éliminer la distorsion et éviter l'ennuyeux "effet de grossissement".

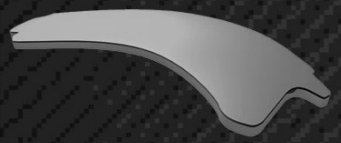

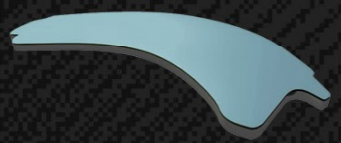

11. REVO MIRRORED FILTERS.

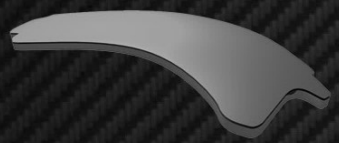

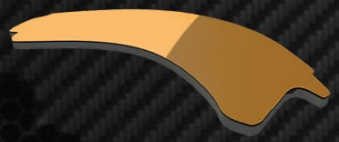

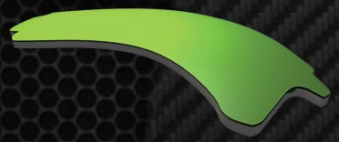

L'effetto specchiato molto moderno e apprezzato. Una protezione ulteriore.
The cool and modern reflective mirror effect. A further protection.
El efecto espejo reflectante apreciado y moderno. Una protección adicional.
L'effet miroir réfléchissant cool et moderne. Une protection supplémentaire.

12. LIFETIME WARRANTY.

Tutte le montature hanno una garanzia a vita contro difetti di fabbrica. All frames have a lifetime warranty against manufacturing defects. Todos las monturas tienen una garantía de por vida contra defectos de fabricación.
Toutes les montures sont garanties à vie contre les défauts de fabrication.

AVIATOR

Open frame with a particularly eye-catching look. Foldable temples in Grilamid TR90™: a high-performance material that bends instead of breaking. The interchangeable nose-pad has special grooves for the outflow of sweat so as not to let the sunglasses fall on the nose during the sport activity. It is also adjustable in width for a perfect fit. The oversized non-interchangeable fixed lens guarantees maximum eye protection and widens the field of vision. It is of cylindrical type that focuses the light by reflecting the image in a vertical line rather than in a single point like normal spherical lenses do. Some wonderful laser effects, very fashionable nowadays, are thus created. On the lens there are also various holes thus to increase ventilation and avoid fogging. Extra lenses in various tints can be purchased apart. Shockproof rigid case, external cardboard box, lens cleaning cloth, warranty and an additional micro-fiber pouch complete the package. Particularly suitable for those cyclists who want to get noticed.

PREDATOR

Totally customizable open-frame goggle with a particularly showy look. Foldable temples in Grilamid TR90™: a high-performance material that bends instead of breaking. The interchangeable nose-pad has special grooves for the outflow of sweat thus not to let the sunglass slip down on your nose. It is also adjustable in width for a perfect fit. The fixed non-interchangeable red lens is FullRevo™ totally monochromatic mirrored and is also cylindrical; it focuses light that reflects the image in a vertical line rather than in a single point as ordinary spherical lenses do. Another very special thing of this sunglass are the upper and lower contours (called "rims") that can be taken off thus to have a more streamlined shape. The same are also interchangeable and can be replaced thus to customize your sunglass the way you like most. Inside the package you will find two full sets: one already mounted on the frame and an additional one in black color. Shock-proof rigid case, external cardboard box, lens cleaning cloth, warranty and an additional micro-fiber pouch complete the package. Particularly suitable for those cyclists who want to get noticed and that love customizing their own sunglass.

DOMINATOR

Technical sunglass with a very modern and up-to-date look with a foldable frame made of Grilamid TR90™: a high-performance material that bends instead of breaking. The interchangeable nose pad is soft and comfortable as well as its fit. An extra spare nose-pad is also inserted inside the package for a longer use of the sunglass over time. There are two sets of interchangeable lenses thus to cope with any light and weather condition: FullRevo™ red or gold total monochromatic mirrored (to be used in summer or with strong sunlight) and clear transparent (for evening rides or during the winter season with reduced sunlight). The lens assembly and disassembly system is very simple, direct and innovative: it is a magnet. Just place the lenses on the top of the frame and insert it. It can be done even with your eyes closed. A very special thing (absolute novelty). Just like the lenses we use for this model: cylindricals that focus the light that reflects the image in a vertical line rather than in a single point as standard lenses do. Another very particular feature of this sunglass are the contours of the lenses (called "rims") that can be replaced thus to customize the final look of the sunglass itself.

ROADSTER

New entry 2023. Open frame sunglass with a pleasant and tapered look with a large central lens. The material with which it is built is foldable, flexible and virtually indestructible: it is made of Grilamid TR90™. Unlike most glasses on the market which have a fixed nose piece, Roadster features an interchangeable nose-pad that is adjustable in width to allow a perfect fit on the face. The large lenses are cylindrical and reflect the image in a vertical line rather than in a single point like the normal spherical lenses do. In this way, spectacular, very flashy and fashionable vertical laser effects are formed. Clear lenses for evening or night rides can be purchased separately. Roadster in available in six different colors in various tints. Shockproof rigid case, lens cleaning cloth, warranty and an additional microfibre pouch complete the package. For cyclists who are looking for a quality eyewear on a relatively limited budget. Excellent price/quality ratio.

Production

They are manufactured in France by Essilor Sun Solution and are guaranteed unbreakable for life. Unlike most standard photochromic lenses, NXT® lenses are fused into the mass of the polymer itself in a very complex manufacturing process, making it more durable and clearly optically superior.

Durability

They are indestructible. Unlike the polycarbonates used in all photochromic lenses of the competition which are rigid, NXT® lenses are a "resinous" and almost "rubbery" material that bends. Impossible to break them. Simply unlike all the others, these they just do not break.

Reaction time

Very fast. At an average temperature of 23°, NXT® lenses change color going from clear to totally dark smoke in less than 15 seconds. They are very fast.

Resistance to solvents

NXT® resists the effect of Acetone. It is not attacked by chemicals nor solvents such as methyl alcohol.

Optical quality

They have a much lower internal stress and chromatic dispersion compared to classic polycarbonates (chromatic aberration 1.5 times lower than polymers) and therefore sharper images and higher definition. The optical quality of NXT® lenses is close to that of mineral glass. Crystal clear images. Perfect vision.

Light variation

Photochromic lenses made of NXT® have the widest Light Transmittance Variation available today in the sport panorama. They range from Category 0 (Lt. 80%) to Category 3 (Lt. 17%) covering four categories of brightness. Impossible to do any better.

15TH

Studied, elaborated and designed in Cremona, it is painted in Veneto and assembled at our premises in Lecco. Technical sunglass with a very modern and contemporary look with a foldable frame in Grilamid TR90™: a high performance material that bends instead of breaking. The nose-pad, interchangeable, has special grooves for the outflow of sweat so not to let the sunglass fall down on your nose. It is also adjustable in width for a perfect fit. There are three sets of interchangeable lenses thus to cope with any light and weather condition: Red FullRevo™ manufactured in France by Essilor Sun Solution (to be used in summer with strong sunlight), transparent (for evening rides or during the winter season) and smoke (to be used in spring and autumn with medium/strong light conditions). The disassembly and assembly of the lenses is really very special: you have to rotate the central wheel of the sunglass to allow lenses to disengage. A very special thing. Just like the paints used. Non-toxic and guaranteed without mercury nor cadmium and with anti-aging UV-A and UV-B treatment. Therefore paints that do not fade nor lose brilliance with time and exposure to sunlight to again witness, if yet necessary, the value of a Power Race sunglass over time. Another particular feature are the underlying rims that can be purchased separately to change the look of the sunglass.
